

Application Serial No. 10/048,114
Amendment dated January 19, 2007
Reply to Final Office Action dated October 19, 2006

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-9 (canceled)

Claim 10 (currently amended): ~~Process~~ The process according to claim [[8]] 15, wherein the information data are transmitted to the data-preparing device over a device engaged between the data-requesting device and the data-preparing device.

Claim 11 (currently amended): ~~Process~~ The process according to claim [[8]] 15, wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the pre-determined data format and transmitted to the data-requesting device.

Claim 12 (canceled)

Claim 13 (currently amended): ~~Process~~ The process according to claim [[8]] 15, wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the predetermined data format and transmitted to the data-requesting device.

Claim 14 (currently amended): ~~Process~~ The process according to claim 10, wherein the requested data are stored in a central data bank of the data-preparing device and, on call, are formatted by a formatting device into the predetermined data format and transmitted to the data-requesting device.

Claim 15 (new): A process for transferring data from a data-preparing device to a data-requesting device, comprising:

the data-requesting device requests, over a network, data to be transmitted to it by the data-preparing device;

Application Serial No. 10/048,114
Amendment dated January 19, 2007
Reply to Final Office Action dated October 19, 2006

the data-requesting device transmits to the data-preparing device over the network information data about the capabilities of the data-requesting device, said information data transmitted by the data-requesting device including a list of usable display formats for the data-requesting device;

the data-preparing device then, according to availability at the data-preparing device, selects the best-suited display format from the list of usable display formats transmitted by the data requesting device; and

the data preparing device then transmits data over the network to the data-requesting device in the selected display format.
